

RED HERRING PUPPETS

ROWBY' s TRAVELS: TECHNICAL INFORMATION

STAGE: Minimum Requirements

8 feet wide, 8 feet deep, and 8 feet high

We bring a proscenium style puppet booth with extension wings off both sides. Most of the action takes place in the 5 foot wide by 30 inch high opening which is 5 feet above the floor

SOUND: We bring our own sound system with 1 microphone backstage and a CD player. When possible, we can run sound from the house system. We can control the CD player ourselves or have someone work (simple)cues from another location The CD player has an RCA output and the microphones uses a standard microphone jack.

LIGHTS: We carry small clamp lights to lessen shadows within the proscenium opening. Aside from that, general area lighting will suffice.

SET-UP: 35 minutes

DURATION OF SHOW: 40 minutes (although this is flexible)

STRIKE: 30 minutes

TURN AROUND: (for consecutive shows) 15 minutes

We are happy to extend the visit with a 10-15 minute question and answer session after the performance when time allows.

ADDITIONAL NEEDS: We require the venue to provide one large (6-8 feet) table and easy access to electricity.
